ESTABLISHED OVER 30 YEARS

THE SUN VAPOR AND GAS STREET LIGHT COMPANY

MANUFACTURERS OF THE WORLD-RENOWNED

"SUN"

INCANDESCENT HOLLOW WIRE LIGHTING SYSTEMS AND GRAVITY LAMPS.

FACTORY AND OFFICES:

CANTON, OHIO, U. S. A.

TELEGRAPHIC ADDRESS:
"SUNVAPOR, CANTON, OHIO."

CODES USED: A. B. C., 4TH AND 5TH EDITION; WESTERN UNION, LIEBER'S AND OUR OWN.

INTRODUCTORY

The "SUN" Incandescent Light produced from the pressure Hollow Wire System, as well as from the Gravity System, has established for itself an enviable reputation of which we are justly proud.

With a varied experience of OVER A QUARTER OF A CENTURY, in all methods of lighting, we are in a position to know just what the trade demands, and have been careful to place no fixture on the market until after it has been given a careful and rigid test.

This rule we always adhered to, and it is the

Open Secret of Our Success.

Think for a moment what vast strides have been made in human progress, and especially in artificial lighting! Until within the last few years brilliant illumination has been too costly a luxury for any but the wealthy. Today it is a necessity as well as a luxury, and the consequent demand for reduced cost has resulted in many inventions. The "SUN" Incandescent Light has solved the problem, and fills the universal demand for

Maximum Illumination at Minimum Cost.

The old Kerosene Lamp has taken a back seat and bows submissively to the triumphant advance of the "SUN" Incandescent Light.

As soon as that great luminary which gives light to the Universe by day, drops out of sight, its namesake, the "SUN" lamp, follows in its orbit, turning night into day, and shedding forth its beautiful incandescent radiance. With the "SUN" Incandescent Light the citizens of small towns and villages, who have heretofore been unable to enjoy the same privileges, as far as brilliant artificial illumination is concerned, as their brethren in larger cities, are now placed on the same basis, and at the same time no exorbitant gas bills to pay for inferior service; no expensive piping or dangerous electric wiring to continually bother and worry them; no freezing gas pipes in mid-winter to contend with, no dynamos to burn out or armatures to repair; and, withal, have a beautiful, white, hydro-carbon light of much greater brilliancy than any other kind of illumination, the soft glow of which is not injurious to the eye; but, on the contrary, is a relief to the visionary organs, and enables all to read with perfect comfort and ease, as though it were broad daylight.

"SUN" Lamps have stood the test under all climatic conditions, and will burn as brilliantly in the frigid and torrid zones as in temperate climates.

Place a "SUN" Incandescent Light alongside of an electric incandescent light, and notice the remarkable difference in favor of the former. Instead of the sickly weak, yellow glow of the electric you will find a powerful and magnificent incandescence.

Each and every one of our fixtures is constructed with a special view to brilliancy, durability, economy, attractiveness, convenience in handling, simplicity of operation and absolute safety.

Every "SUN" light is a complete GAS PLANT in itself, generating and burning its own gas. The gas, which is known as "hydro-carbon" gas, is generated and consumed just as needed, by means of our patent generator.

There are no wicks to trim, no greasy chimneys to continually clean, and are so simple that a child can operate them.

Fluid Used.

The kind of fluid used in "SUN" Incandescent Lamps is the ordinary deodorized stove gasoline and can be procured at almost any grocery store in the United States where kerosene is sold, or from some Standard Oil Company agency. In English Colonies the fluid is called PETROL.

"SUN" Incandescent Lamps are NOT INTENDED FOR KEROSENE, but for GASOLINE ONLY.

Insurance Permit.

"SUN" Lamps are included in the list of Permitted Gasoline Vapor Lamps issued by the Consulting Engineers of the National Board of Fire Underwriters.

Consumption of Fluid.

One-fourth of a gallon of ordinary stove gasoline will burn from 12 to 15 consecutive hours in a "SUN" one-burner gravity lamp, and produce a 100-candle power light, consuming 80 per cent. less oil than a Rochester kerosene lamp and giving 50 per cent. more light. The following table will show the saving in cost of operating a "SUN" Incandescent Lamp in comparison with other methods, computing gasoline at 12c per gallon.

Comparative Cost.

1 Electric Incandescent Lamp of 16 candle-power burning 100 hours per month—1200 hours per year	$ 9.00
1 Acetylene Gas Jet of 20 candle-power, with carbide at $90 per ton	8.34
1 Gas Jet of 16 candle-power, burning 5 feet per hour—6000 feet per year	6.00
1 Rochester Coal Oil Lamp, burning 1200 hours per year, and requiring one gallon of oil for every 10 hours' service	7.20
1 "SUN" Incandescent Single Burner Lamp, burning 1200 hours	2.40

Gravity Lamps

In placing these new Hydro-Carbon Lights on the market we realized that the demands of our agents' customers would be of varied nature, some wanting gravity fixtures, all ready to hang up and light up, (with exception of fluid) handsome enough for parlor or drawing room, others being satisfied with those not quite so elaborately finished, but gotten up in an attractive and substantial manner, with a moderate amount of ornamentation, and still others who would simply want a chandelier, pendant or wall lamp substantially and solidly constructed without regard to ornamentation provided the illumination was powerful, brilliant and economical. A glance at the illustrations on pages 6 to 19, and pages 30 to 35 will show what has been done in this direction.

How To Order Gravity Lamps.

Use our gravity lamp order blank which we furnish free, being careful to designate the lamps wanted by their proper numbers or code words. Write name and address plainly, and state whether goods are to be sent by express, freight or mail. Enclose remittance with order; or if you wish goods sent C. O. D., enclose one-third of amount of purchase to show good faith. Agents will find it advantageous to order in lots of dozen or more, thereby saving in transportation charges. We deliver goods carefully packed F. O. B. cars Canton, Ohio, making no charge for packing or drayage.

THE "SUN" HOLLOW WIRE LOW PRESSURE SYSTEM

illustrated on pages 20 and 21 of this Catalog, judging from the many orders received from our agents and the numerous unsolicited testimonials of their customers, is far in advance of any other on the market.

"SUN" Low Pressure Hollow Wire Lamps do not depend on the wire itself as their only means of support when hanging from the ceiling, as is the case with other makes, as we consider that method unsafe. Each lamp is provided with a neat and strong ceiling plate, to which is screwed and riveted in a solid manner, a brass connection for the lamp and wire. Then this ceiling plate is covered with an attractive canopy matching the finish of the lamp, making the ceiling plate invisible. (See pages 20 and 21).

The "SUN" Hollow Wire (or tubing) is not weakened by cutting threads on it for making connections, but, instead, is brazed with pure silver solder, thereby making the wire even stronger at the connecting points. Only the very best quality Hollow Wire Tubing which is tested under a pressure of 150 pounds before leaving the foundry is used in the "SUN" system.

When complete "SUN" Hollow Wire Systems are ordered, no charge whatever is made for cutting the wire tubing to the required lengths or putting on the necessary tees, jambs, nuts, etc.

The services of a mechanic are entirely unnecessary to install the "SUN" Hollow Wire System. Anyone can do it, as we get everything ready, and the system is shipped all ready to put in place without any trouble whatever.

Pressure Tanks for the "SUN" Hollow Wire System can be placed in the cellar or in the attic, outside of the house or anywhere most convenient. While each tank is tested at first under 100 pound pressure and then under 50 pounds, ONLY TEN TO FIFTEEN POUNDS pressure is needed to produce the most magnificent light.

Only brass pressure pumps of the very best quality are used for the "SUN" system, and they are put in at about cost. The pump has a double plunger, and is fitted complete with hose, nipple, etc., all ready to connect with tank. Just a few strokes of the pump is usually sufficient for an entire week or more for an ordinary number of lamps.

With the "SUN" system, any one lamp, or any number of lamps can be operated independently; and when wanting to extinguish one lamp it is unnecessary to turn them all out. One lamp only, or even one burner only, can be left burning if desired.

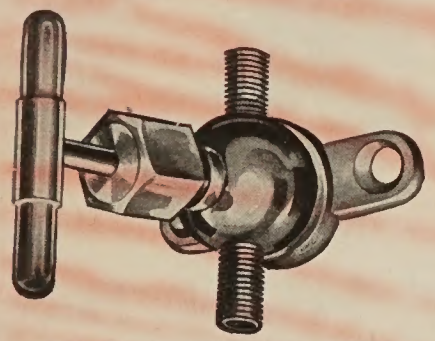
The "SUN" system can be used for low ceilings as well as for high. The standard length of the lamps is 36 inches. This length can be reduced without extra cost. We add to the standard length at the rate of 25 cents per foot, net.

HOW TO ORDER THE "SUN" HOLLOW WIRE LOW PRESSURE SYSTEM

When ordering by mail, use our regular Hollow Wire System Order Blanks which we furnish free, designating the style of lamps wanted by their numbers, placing the letter "H" after the number, as shown on pages 20 and 21. (The letter "H" means they are for the Hollow Wire System.) Write your name and address plainly, and state whether goods are to be sent by Express, Freight or Mail.

Enclose remittance with order, or if you wish goods sent C. O. D., enclose at least one-third of amount to insure good faith. It is always best to remit full amount with order, thus avoiding C. O. D. charges.

When desired, we can furnish, in addition to those lamps illustrated on pages 20 and 21, any of the other styles which are shown on pages 6 to 18 inclusive, converted into and suitable for the Hollow Wire System, at the same prices. In ordering them for the Hollow Wire System, always be sure to add the letter "H" to the number.

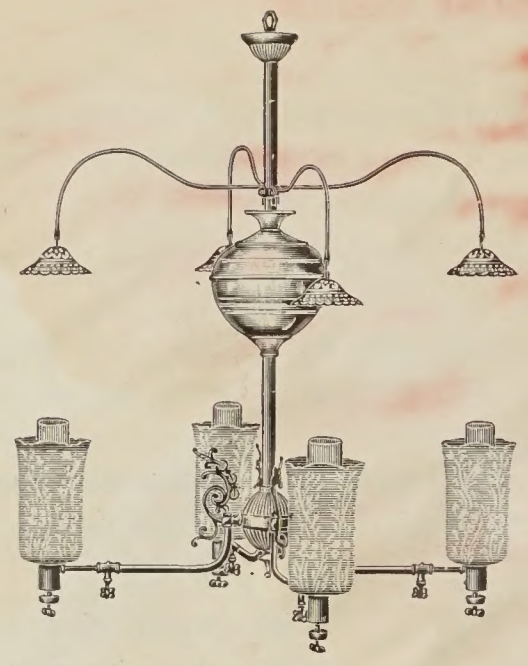


No. 824 GLOBE WALL VALVE.
Code Word, "WALLOW."
Price $1.00
This Valve is very useful for shutting off all the lights on the Hollow Wire System at once. It is attached to the wall at some convenient place, say 5 or 6 feet from the floor, between tank and first lamp.

While a 2-gallon capacity pressure tank is sufficient for a two or three light system, it is always best to order at least a 5-gallon capacity tank, so as to provide for more lamps in the future in case they should be wanted. For a system of more than a half dozen lamps, a 10-gallon tank should be ordered.

Enclose with your order a pen or pencil diagram (just a rough one will do) showing where you want to place the tank, also where you want to place the No. 824 Wall Valve, and where you want to hang each of the lamps; draw a line between each, giving the distance of each line; also give the height of your ceiling. Wherever you want to hang the hollow wire leading from the tank to the wall valve and from there to each of the lamps, up along wall, ceiling, through floor, etc., is where you should take the measurements, and these measurements are what we want to enable us to cut the wire to the proper lengths and put on the necessary connections.

Wherever the Sun Shines by Day, the "SUN" Lamp Shines by Night.



Code Word, "AXE" **No. 212-A.**

"SUN" Fancy Four-Light Chandelier

400 CANDLE POWER.

Standard Length, 36 in. Standard Spread, 26 in.
A great favorite. Very Ornamental.

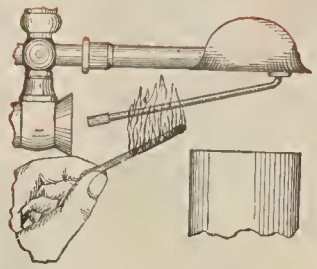
"CANTON-SUN"

ONE-MATCH OVERHEAD-GENERATOR LAMPS

On the following pages are shown illustrations of "CANTON-SUN" One-Match-Generator Lamps. Note their strong, substantial construction, their handsome and neat appearance, and be convinced of their superiority over cheap imitations.
These One-Match Lamps cannot be reduced in length for low ceilings.

HOW THE MATCH SHOULD BE HELD TO GENERATE LIGHT.



"CANTON-SUN" One-Match Lamps do not require alcohol. A great advantage is the heat deflector above the chimney, and all our One-Match Lamps are equipped with heat deflectors.

THE SUN VAPOR AND GAS STREET LIGHT COMPANY,

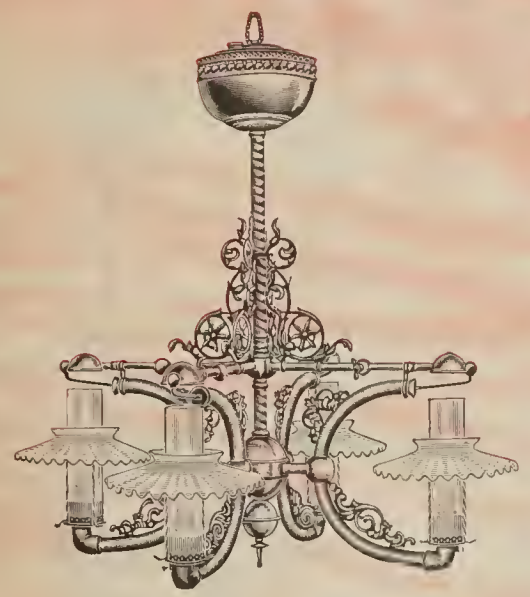
CANTON, OHIO, U. S. A.

Codes Used: A. B. C. 4th Edition. A. B. C. 5th Edition. LIEBER'S. WESTERN UNION, and our own Private Codes.

Cable Address: "SUNVAPOR, CANTON, OHIO."

CANTON-SUN" MODEL No. 1-A.

One Match Generator. Two Quart Reservoir.



Price, complete, as above.....$32.00

Code Word, "CHATER."

Length, 30 Inches. Finished in Copper Oxide Only.

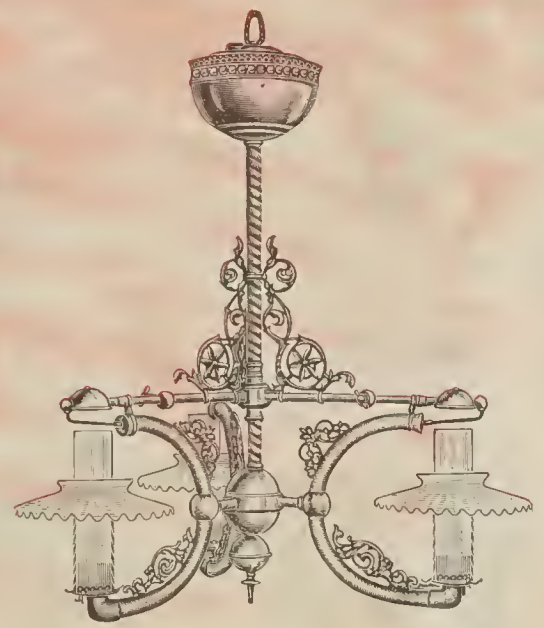
Heretofore the demand for one match generators has been chiefly confined to one-light and two-light fixtures, but is now extending to three and four-light.

The above four-light Chandelier is a highly finished model of beauty, substantially made and graceful in appearance. Elaborate ornamentation.

Four hundred candle power.

"CANTON-SUN" MODEL No. 2-A.

One Match Generator. Two Quart Reservoir.



Price, complete, as above.....$27.50

Code Word, "CHEVALIER."

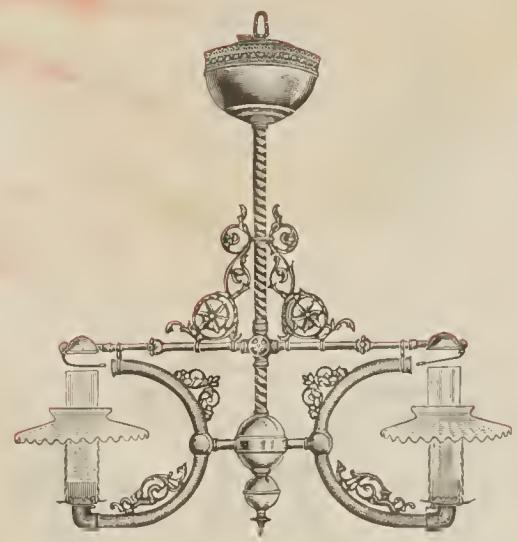
Length, 30 Inches. Finished in Copper Oxide Only.

This fixture is highly finished, made up of special design in fittings, trimmings and tank; is strong and graceful and must be seen to be fully appreciated; it has been especially designed to meet the demand for an ornamental fixture.

An ornament to any parlor. Three hundred candle power. You will find no lamp superior to this one.

CANTON-SUN" MODEL No. 3-B.

One Match Generator. Two Quart Reservoir.



Price, complete, as above.....$17.00

Code Word, "CHEVAGE."

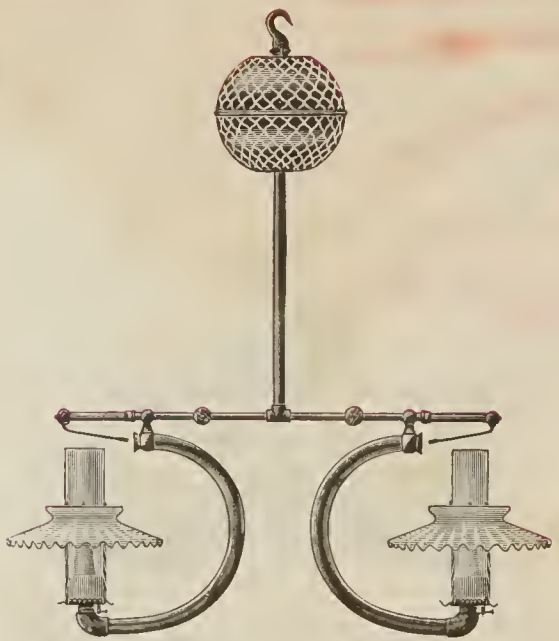
Length, 30 Inches. Finished in Copper Oxide Only.

This beautiful two-light fixture with its elaborate ornamentation is similar to Model No. 3-A, but instead of any fancy globes, it is equipped with fluted opal shades.

Two hundred candle power.

"CANTON-SUN" MODEL No. 7.

One Match Generator. Two Quart Reservoir.



Price, complete, as above.....$11.00

Code Word, "COLLEGE."

Length, 30 Inches. Finished in Copper Oxide Only

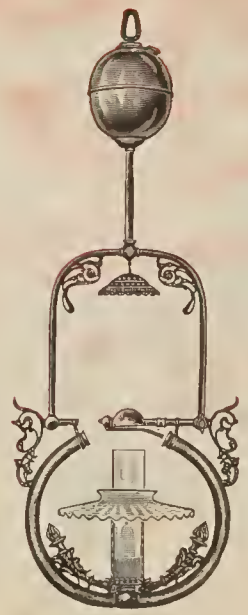
This fixture is one of the very latest designs, has rigid arms, is strongly and well made, and, in fact, is very handsome in appearance for medium priced lamp.

Our lamps are better than electricity or gas and cheaper than oil.

When you buy one, you want more of them.

"CANTON-SUN" MODEL No. 10.

One Match Generator. One Quart Reservoir.



Price, complete.....$10.50

Code Word, "CHANSON."

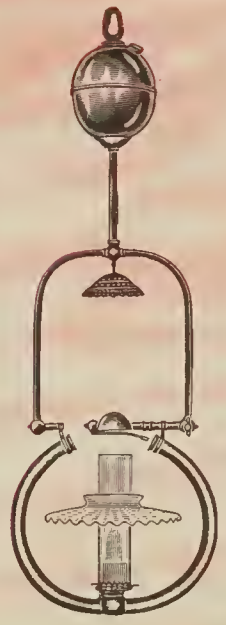
Length, 37 inches. Finished in Copper Oxide only.

A handsome fixture for house or store. A beautiful vestibule or hall lamp.

One Hundred Candle Power.

"CANTON-SUN" MODEL No. 11.

One Match Generator. One Quart Reservoir.



Price, complete.....$9.50

Code Word, "CHANTEUR."

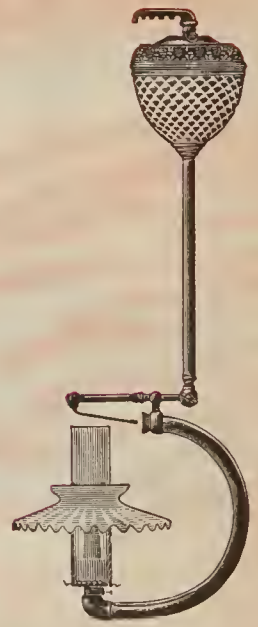
Length, 37 inches. Finished in Copper Oxide only.

Substantially constructed and very neat in appearance.

One Hundred Candle Power.

"CANTON-SUN" MODEL No. 9.

One Match Generator. One Quart Reservoir.



Price, complete.....$7.50

Code Word, "COBBLER."

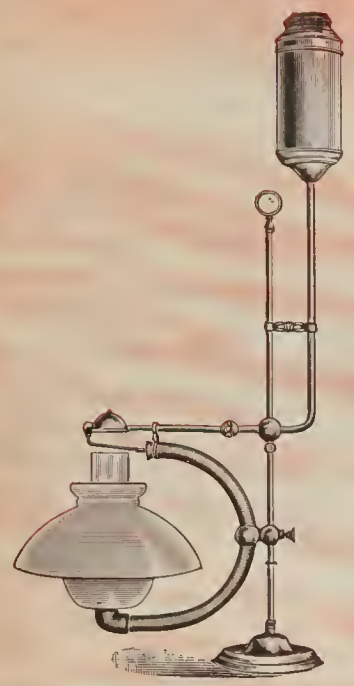
Length, 30 inches. Finished in Copper Oxide only.

Handsomely embossed reservoir and corrugated hanger. Never fails to hang straight.

One Hundred Candle Power.

"CANTON-SUN" MODEL No. 18.

One Match Generator. One Quart Reservoir.



Price, complete, as above.....$10.50

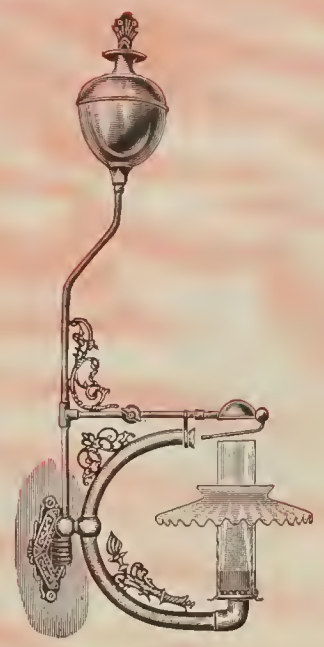
Code Word, "CLUSHER."

Length, closed, 34 inches. Nickel finish.

One Hundred Candle Power. Equipped with dome and eye shades.

"CANTON-SUN" MODEL No. 17.

One Match Generator. One Quart Reservoir.



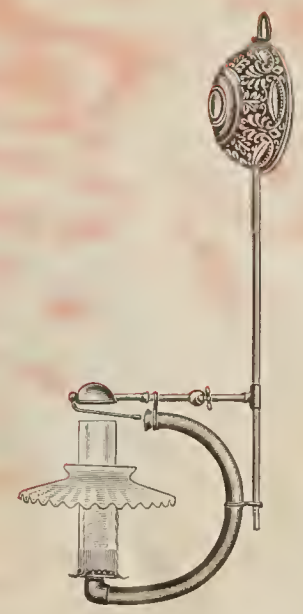
Price, complete, as above.....$9.50

Code Word, "CLUSHING."

Length, 30 inches. Finished in oxidized copper. Beautifully ornamented. Swings from side to side. This is a handsome wall bracket lamp. One Hundred Candle Power.

"CANTON-SUN" MODEL No. 16.

One Match Generator. One Quart Reservoir.



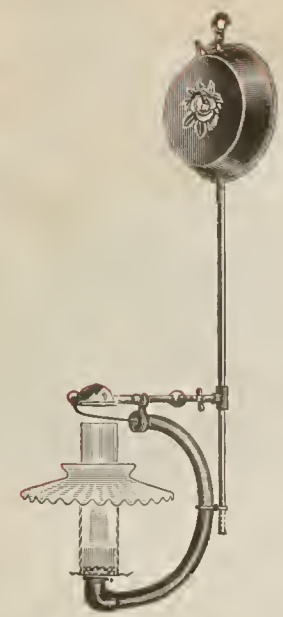
Price, complete.....$7.50

Code Word, "CLUSH."

Length, 30 inches. Oxidized Copper. Handsome Wall Fixture of Decorative Design. One Hundred Candle Power.

"CANTON-SUN" MODEL No. 15.

One Match Generator. One Quart Reservoir.



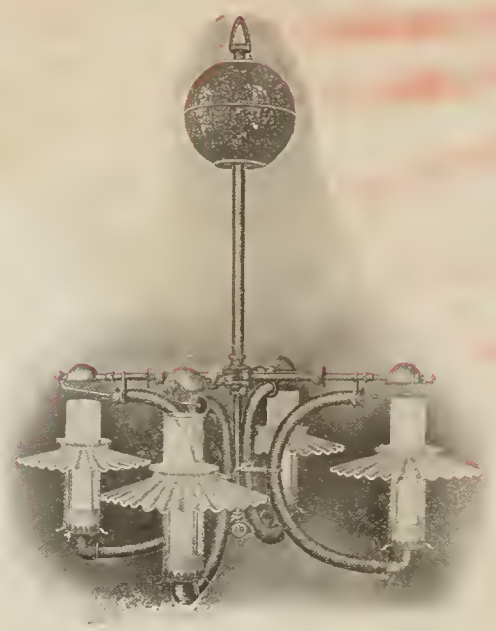
Price, complete.....$6.50

Code Word, "CLUSTER."

Length, 30 inches. Enameled Maroon finish. A practical and strongly constructed wall lamp for kitchen, factory, or mill. One Hundred Candle Power.

"CANTON-SUN" MODEL No. 1.

One Match Generator. Two Quart Reservoir.



Price, complete, as above.....$24.00

Code Word, "CHATEAU."

Length, 30 Inches. Finished in Copper Oxide Only.

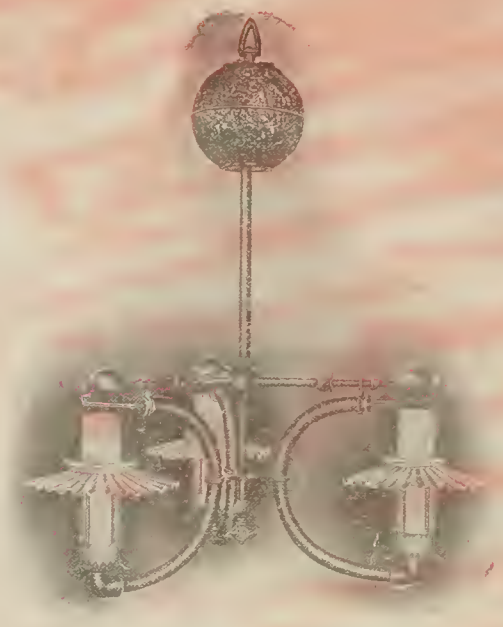
Heretofore the demand for one match generators has been chiefly confined to one-light and two-light fixtures but is now extending to three and four-light.

The above four-light Chandelier is a highly finished model of beauty, substantially made and graceful in appearance.

Four hundred candle power.

"CANTON-SUN" MODEL No. 2.

One Match Generator. Two Quart Reservoir.



Price, complete, as above.....$20.50

Code Word, "CHEVAL."

Length, 30 Inches. Finished in Copper Oxide Only.

This is the same class of highly finished and substantial fixture as Model No. 1 but has three lights instead of four.

Three hundred candle power.

There is no better three-light fixture on the market. You will be delighted with the beautiful illumination, and pleased with the ease with which it is lighted.

"CANTON-SUN" MODEL No. 3.

One Match Generator. Two Quart Reservoir.

Price, complete, as above.....$12.50

Code Word, "COMPASS."

Length, 30 Inches. Finished in Copper Oxide Only.

This fixture is highly finished, made up of special design in fittings, trimmings and tank; is strong and graceful and must be seen to be fully appreciated.

Two hundred candle power, and burns 15 hours at one filling. All "Canton-Sun" lamps are made according to specifications of the National Bureau of Underwriters.

"CANTON-SUN" MODEL No. 3-A.

One Match Generator. Two Quart Reservoir.

Price, complete, as above.....$19.00

Code Word, "CHEVATER."

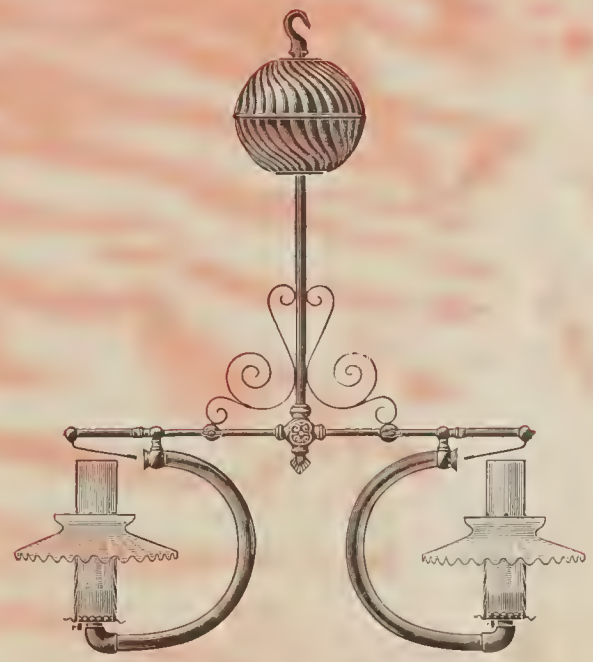
Length, 30 Inches. Finished in Copper Oxide Only.

Similar in construction, ornamentation and finish to the Nos. 1-A and 2-A, but equipped with fancy globes instead of fluted shades. A great favorite.

Two hundred candle power.

"CANTON-SUN" MODEL No. 6.

One Match Generator. Two Quart Reservoir.



Price, complete, as above.....$12.00

Code Word, "CARPET."

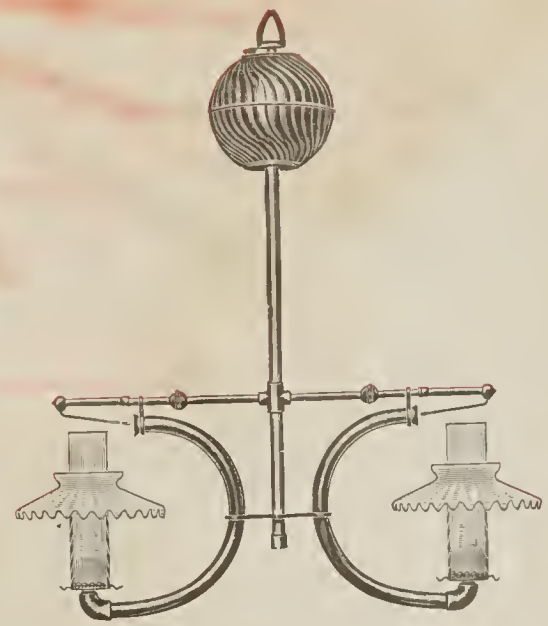
Length, 30 Inches. Finished in Copper Oxide Only.

This fixture has rigid arms, is elegantly and strongly made, and is the very latest design in gasoline lamps.

You can use one burner of our chandelier at a time just as well as both.

"CANTON-SUN" MODEL No. 4.

One Match Generator. Two Quart Reservoir.



Price, complete, as above.....$11.50

Code Word, "CLEAVER."

Length, 30 Inches. Finished in Copper Oxide Only.

For a medium priced, neat, strong and attractive fixture you need look no further. This one will exactly fill the bill.

It's a 200 candle power lamp and will burn 15 hours at one filling. Every lamp sold brings another order. Our lamps are safer than oil lamps.

If It Were Only Practicable

it would please us greatly to have enquirers and prospective patrons glance over our daily mail and see for themselves the many flattering, unsolicited testimonials which constantly pour into us from grateful purchasers of SUN Lamps. All we can do is to pick out a few at random, which please consider as

ONLY A DROP IN THE BUCKET!

SEE WHAT CHURCH PEOPLE SAY!

Economical, Clean, Brilliant, Convenient.

The Sun Vapor Street Light Co.,
Canton, Ohio.

Gentlemen:—After using the different lights for tabernacle services FOR TWENTY YEARS. I find the SUN Vapor Incandescent Light the MOST ECONOMICAL, THE CLEANEST, MOST CONVENIENT AND BRILLIANT LIGHT I EVER USED.

Yours, etc.,
D. E. LINDSEY, Elder,
Clyde, Ohio.

"Five Times More Light at One-Sixth Cost."

The Sun Vapor Street Light Co.,
Canton, Ohio.

Gentlemen:—Last year we lighted our church with ten incandescent electric lights, at a cost of $60.00 a year. This year we have lighted our church with eight Sun Vapor Lights of 100 candle power each, AT A COST OF ONLY $10 FOR THE ENTIRE YEAR AND MORE SERVICE. FIVE TIMES THE AMOUNT OF LIGHT AT ONE-SIXTH THE COST. How is that? THE LIGHTS ARE WORKING AS WELL TODAY AS WHEN THEY WERE FIRST PUT IN.

Sincerely yours,
H. V. SUMMERS, (Pastor Grace U. E. Church),
Findlay, Ohio.

Many Compliments Passed.

Sun Vapor Light Co.,
Canton, Ohio.

Gentlemen:—Lights were beyond our expectation. Many compliments were passed. One lady who had come to church with a small rent in her shirt waist, said nobody would notice it, but with your lights it could be seen at night as well as daytime.

J. M. WEATHERS, Jr.,
Marengo, Ind.

SEE WHAT CHURCH PEOPLE SAY!

"No Excuse for Color Blindness by Night."

The Sun Vapor Street Light Co.,
Canton, Ohio.

Gentlemen:—Though my experience with the four-light chandelier in the U. E. Church here is limited, I can say that its lighting capacity is limited only by the walls of the church. The beauty and brilliancy of the light is all that could be desired. Cheap? Yes, as there is no oil dripping around and no more smoked chimneys to clean; and in CHEAPNESS OF OPERATION THEY EXCEL ALL OTHERS. Indeed, they are fully satisfactory and need only to be tried to be appreciated. BY THEIR BEAUTIFUL WHITE LIGHT THE LADIES CAN NOW VERY READILY DETERMINE THE COLORS OF THE FLOWERS IN THEIR NEW HATS. NO EXCUSE FOR COLOR BLINDNESS BY NIGHT.

Respectfully yours,
M. B. TEMPLIN, (Conference Trustee.)
Calla, Ohio.

"More Light From Two Sun Lamps Than Twenty Oil Lamps.

The Sun Vapor Light Co.,
Canton, Ohio.

Gentlemen:—The lights ordered from you for our church arrived in good time and in good order. I put them in place and we used them the same evening. THEY ARE MORE THAN WE DARED HOPE FOR. We had 20 oil lamps in our church, and the TWO "SUN" LAMPS GIVE A GREAT DEAL MORE LIGHT THAN THE TWENTY OIL LAMPS. Thanking you for your promptness and hoping to be of service to you in the near future, I am,

Yours sincerely,
A. H. BRINK, (Pastor.)
Noxen, Pa.

SEE WHAT CHURCH PEOPLE SAY!

"Illumination of the Most Brilliant Kind."

(Universalist Fair.)
(Clipping from Portland, Me., Daily Press.)

"It is the opinion of everybody that the display of articles at the booths of the Universalist Fair is the most lavish and attractive ever seen on a similar occasion in this city. * * A word should be spoken about the brilliant lighting of the hall. L. G. Woodbury and W. W. Rich have supplied FIVE "SUN" INCANDESCENT VAPOR LIGHTS OF 100 CANDLE POWER EACH, and ILLUMINATION OF THE MOST BRILLIANT KIND IS PROVIDED."

Everybody Delighted With the Wonderful Lamp.

The Sun Vapor Street Light Co.,
Canton, Ohio.

Gentlemen:—We wish to let you know chandelier was received all right. I hung it up the same day in our church, and oh! what a difference between the coal oil lamps and yours. Everybody was delighted with that wonderful light, and a visiting brother became so enthusiastic that he gave me some money to buy another.

Respectfully,
FREDERICK H. POKORNY, (Trustee)
Altoona, Pa.

More and Better Grade Light than Four Large Lamps.

The Sun Vapor Street Light Co.,
Canton, Ohio.

Gentlemen:—I sold the sample lamp to a small chapel. They tried it Sunday night and were more than pleased with it. It makes a good deal more light and a better grade than four large lamps.

Yours truly,
CHAS. K. RANKIN,
Greenville, Pa.

"SUN" Lamps Have Relegated to the Rear the Old Lighting Systems. "SUN" Lamps are a Terror to Those Who Love Dark Places.

HAVE "SUN" LAMPS STOOD THE TEST OF TIME? SEE WHAT THEY SAY.

After Four Years' Use Could Not Do Without "SUN" Lamps.

Boiling Springs, Pa.

Sun Vapor Light Co.,

Dear Sirs:—I have been using your lights now going on four years and would not do without them. * * * *

Respectfully,

M. S. HERR.

Over Two Years and Still Entirely Satisfactory.

Chehalis, Wash.

Sun Vapor Light Co.,

Dear Sirs:—Enclosed find P. O. order for which please mail me one Sun Burner. I have been using three of your lamps over two years and they have proved entirely satisfactory.

Yours truly,

F. J. ALLEN.

Two Years and Only Expense Half Doz. Mantles.

Frankfort Hill, N. Y.

Sun Vapor Light Co.,

Gentlemen.—Some two years ago I purchased from your company three Chandeliers for our Church, and as I was writing I wish to give testimonial, too, for the excellent light and service. All the expense we have had is for one-half dozen mantles. Our people want nothing else but your lights.

Yours truly,

B. L. NICHOLS.

Five Years and Finest Lamp in Existence.

Evansport, O.

Sun Vapor Light Co.,

Gents.—Please send your catalogue and net prices. My brother is in the drug business at Clarkton, and he thinks he can sell a few lamps in his town. He saw the No. 101 here in my office that I have used for five years, and he thinks they are the finest lamps in existence.

Yours truly.

J. C. GARBER.

Four Years' Use and None to Equal "SUN" Lamps.

Catawba Island, O.

Sun Vapor Light Co.,

Gentlemen:—Enclosed find card showing number of hours our lamp has burned with one filling. (Lamp purchased July 25th, 1901.) I am burning two or three different lamps but find none to equal the "SUN" Lamp.

Yours truly,

CHAS. TRAUB.

Four Years and Still Give Best of Satisfaction.

Milwaukee, Wis.

Sun Vapor Light Co.,

Gentlemen:—Some time ago (1901) a Mr. Rowlands, of Pewaukee, where I live, had the agency for your lamps and I purchased two at that time which are now giving the best of satisfaction, and I have had quite a number of inquiries about getting them. * * * I would be glad to hear from your house with full particulars as to price of lamps, etc.

Yours very truly,

J. F. JONES.

Four Years' Use in Jamaica.

Newport, Jamaica.

Sun Vapor Street Light Co.,

Canton, Ohio, U. S. A.

Dear Sirs:—We have had your lamps in regular use for nearly four years, and are very well pleased with them.

With sincere regards, I am, dear Sirs,

Yours faithfully,

MRS. R. W. MILES.

Three Years and Good Name.

Castalla, O.

Sun Vapor Light Co.,

Dear Sirs:—The lamp I got of you people three years ago has given the best satisfaction. Your lamps have a good name in this locality.

JAY R. FOX.

Over Four Years and Burning Sixteen Hours a Day.

Bryan, O.

Sun Vapor Light Co.

Dear Sirs:—I have been going to write you for some time. Gasoline lamps have come to stay. Your lamp comes the nearest perfect of all Gasoline Lamps. The Sun Lamps I bought of you over four years ago are each of them still in use and some of them burning sixteen hours per day. I talk your lamps and advertise them. Some have been duped on poor, cheap lamps until they are afraid, but when they find out that their neighbors are using Sun Lamps, then they become interested. You are on the right road and are bound to make it win out because you make the lamp that burns.

Yours truly,

H. W. SNOW.

"SUN" LAMPS ARE PRAISED IN EVERY STATE, IN EVERY COUNTRY, IN EVERY TONGUE.

Following are Abridged Clippings of Voluntary Testimonials from Each State and Territory, Space Forbidding Complete Reproduction.

ALABAMA—Hope the "Sun" light will by and by be the public light in our town. (Rev. Karl Arry, Silverhill.)
ALASKA—Send me address of firm carrying your lamps in Seattle. If no agent there send me lamp 251 to Seattle Hdw. Co. (H. H. Hicks, Iliamna.)
ARKANSAS—Your lamps work just fine. Am proud of them and think I can sell a good many. (W. W. Loyd, Helena.)
ARIZONA—I got my lamp and think it is the best lamp I have even seen. (Charles L. Day, Chin Lee.)
CALIFORNIA—The "Sun" lamp makes the old grease lamps go-way-backavich-and-sit-down-ski. (Frank Haasis, Ontario.)
COLORADO—Tried both lights last night. They are right and gave complete satisfaction. (Frank S. Marsh, Greeley.)
CONNECTICUT—Received your lamp and can truthfully say that it does all, if not more than your catalogue states. (G. H. Cornish, Stanford.)
DELAWARE—I received lamps in good shape. Am satisfied with them and will take agency. (George Piepenbring, Wilmington.)
DISTRICT OF COLUMBIA—Have been exporting to Argentine American goods where your lamps would be of practical use and successful sale. (Ricardo Call, Wash.)
FLORIDA—The three lamps received and giving perfect satisfaction; please ship five more. (M. T. Swift, Punta Gorda.)
GEORGIA—Goods reached Athens in good order. They are far superior to electric lights in my estimation. (E. A. Veal, Athens.)
IDAHO—Lamp No 250 received last week. I think it an excellent light. (S. McGuire, Creston.)
ILLINOIS—Received the incandescent lamps; have sold five already; they beat any other lamp made. (Carl Schwengels, Winnebago.)
INDIANA—The chandelier you furnished for city council is fine and furnishes all the light we need in the city hall. (E. D. Stephenson, Colfax.)
INDIAN TERRITORY—Have received lamps and very much pleased with them. (Geo. Wilcox, Atoka.)
IOWA—The No. 250 lamp received. It has proven true to its name; one of the best lamps I ever saw. (J. W. Greenley, Epworth.)
KANSAS—We have received the lamp; used it several nights; it proves successful. (United Lumber Co., Fall River.)
KENTUCKY—To say I am pleased don't express it. I am more than pleased. (W. W. Briney, Louisville.)
LOUISIANA—I am proud of the light and my husband is delighted with the use of it in his store. (Mrs. A. V. Boutle, New Iberia.)
MAINE—The lights are more than satisfactory. They are simply immense. (H. H. Lee & Co., Augusta.)
MARYLAND—Have given your lamp a test and find it all you claim it to be. (Wm. B. Kurtz, Baltimore.)
MASSACHUSETTS—Your burners are away ahead of all the burners I have been using. (Edw. Sjostrom, Worcester.)
MICHIGAN—The lamps I sold last winter giving excellent service and have proven superior to several other makes here. (Albert Wenham, Kalamazoo.)
MINNESOTA—Lamp came to hand; much pleased with it; for small rooms 100 candle power is too strong. Takes the place of three lamps easily. (J. H. Williams, Duluth.)
MISSISSIPPI—The lamp makes by far the most superior and greatest light of anything of its size on earth. (M. R. Mitchell, Jackson.)
MISSOURI—Have used your lamps eleven months and have had the best lighted store in town during that time. (W. S. Thorne, Moberly.)
MONTANA—Lamp recived; gives a grand light. Everyone that sees it is enraptured. (A. D. Lovely, Clyde Park.)
NEBRASKA—Your lamps that I sold have been fully tested and found to be just as represented by all buyers. (Alex S. Romberg, Scribner.)
NEVADA—We are ordering this lamp for the Oasis. Believe they are just the thing for street lighting. (Emil Stauf, Goldfield.)
NEW HAMPSHIRE—About a year ago I bought a No. 205 chandelier. It gives the finest light I ever saw. (H. H. Dohrn, East Jaffrey.)
NEW JERSEY—The two lamps came in good condition; gave a grand illumination, far byond my expectations. (P. F. Rue, Tennent.)
NEW MEXICO—Received Sun Lamp all right and am very much pleased with it. (Mrs. Emma Reitz Heilbig, Sante Fe.)
NEW YORK—I have a No. 134. It is perfect and gives as good light as possible for any kind of lamp to give. (S. V. Beeles, Great Valley.)
NORTH CAROLINA—This will inform you I received the chandelier and am charmed. The light excels anything I have seen. (C. A. Ulmer, Wilmington.)
NORTH DAKOTA—Please ship by express one No. 250 Pendant. Was not in position to take agency until now. (T. G. Zeiders, Knox.)
OHIO—Received lamp No. 143. It's all one could ask for in the way of light, and it is a real beauty. Cut in catalog does not do it justice. (O. E. Beaty, St. Paris.)
OKLAHOMA—Pleased to advise that chandelier No. 210-A gives a magnificent light; several parties thinking of buying. (E. D. Towner, Newkirk.)
OREGON—I received the light; am very proud of it; think I have a couple more sold already. (I. A. Clem, Treewater.)
PENNSYLVANIA—Beats all the light that ever struck this town; the Sun Vapor beats them all. (Ernest E. Wagner, North East.)

THE HOME OF THE "SUN" LAMP IS THE WHOLE CIVILIZED WORLD!

Abridged Clippings from Every State and Territory—Continued.

RHODE ISLAND — Will send you an order next Thursday. The lamp you sent me is O. K. in every respect. (D. Lamothe, Woonsocket.)
SOUTH DAKOTA — I would like to handle your lamps in this section as I consider them better than the Chicago light. (Al. Harris, Seneca.)
SOUTH CAROLINA — I have the honor to say I am well pleased with the "SUN" lamps. (Rev. Curtis R. Waters, Madison.)
TENNESSEE — The lamps for Rankin & Co. received in good order and act like a charm. (J. R. Hughes, Hartville.)
TEXAS — The lamps are giving more than satisfaction to us. (A. L. Blanchard, Hillsboro.)
UTAH — Have had lamps lighted a few nights past. They give more light and better quality than several electric lights. (Harry Carter, Nephi.)
VERMONT — The three lamps received. They are away ahead of anything I ever saw. (Frank L. Hulett, Pawlett.)
VIRGINIA — Displayed sample last night and it worked to perfection; have conditionally sold ten chandeliers. (Smith & Co., West Point.)
WASHINGTON — You may expect quite a number of orders; old lamps are as good as new with your burners. (A. E. McMichael, Spangle.)
WEST VIRGINIA — I send you photographs of your lights at Fairmont Park, W. Va. Better than electric; caused universal favorable comment. (J. L. Devenny, President.)
WISCONSIN — Lamp has been giving perfectly satisfactory service; would not exchange for a dozen kerosene lamps. (Lynn Rockwell, Daerien.)
WYOMING — Please send me five mantles by mail. The lamp gives satisfaction. (W. A. Zook, Cambria.)

A Few of Hundreds of Reasons Why You Should Buy the "SUN" Incandescent Lamp.

BECAUSE it's THE BEST EVER INVENTED and protected by original patents.

BECAUSE its light is a flood of Magnificent Incandescent Radiance.

BECAUSE there is no grease, smoke or disagreeable odor.

BECAUSE a half dozen incandescent Bulbs, or Acetylene Jets, or Gas Jets, or 10 Kerosene Lamps, or a couple of big Rochester Oil Lamps will not equal in Beautiful Brilliance one Single Burner "Sun" Lamp.

BECAUSE purchasers of other makes of so-called Incandescent Lamps discard their lamps for the "SUN."

BECAUSE others unsuccessfully try to imitate the "SUN" Lamp.

BECAUSE the "Sun" Lamp soon pays for itself.

BECAUSE the brilliancy from one "SUN" burner equals that of 100 candles.

BECAUSE it gives the Greatest Light at the Least Cost,

BECAUSE it does not have any ugly shut-off valve directly connected with the Burner.

BECAUSE it is made of VERY BEST MATERIALS.

BECAUSE it is used in every state in the Union and every part of the World.

BECAUSE a child can operate it.

BECAUSE its manufacturers are The Sun Vapor and Gas Street Light Co., of Canton, Ohio, a Responsible Incorporated concern, of $100,000.00 Capital, that is known all over the world as the most reliable, largest and oldest established house in its line in existence.

THE SUN VAPOR AND GAS STREET LIGHT COMPANY,

SUCCESSORS TO

The Sun Vapor Light & Stove Co., The Ohio Street Lighting Co., The Belden Burner Co., Minnesota Street Lighting Co., The Western Street Light Co., and The Columbus Lantern Works.
